Subject: Unfair practice

why is it that the PUC will not allow a public hearing for the sake of 1,300 'LOCALS', if by chance your are looking for the welfare of us? we have not received any dialogue regarding our benefits from the "NEW COMPANY", we have not had more than a hour of glossy words to supposedly satisfy the pallet, and now a few of you decide for our future on this island of Aloha that we are not entitled to questions through that of our own mediator the "Union"...who are you for? Walter Dods and the local secret investor group and hang us...this stinks, you folks are underestimating and undermining the integrity of us 1,300 employees..shame on you few deciding people..i hope you dont have family in this company and maybe if you do, they may be in a position to have a favored job

and if in fact the public hearing is not required by law, so you dont have it? when so much push from many vendors regarding the effects that this take over will be and yet you few take NO consideration of that, shame, shame on you...and yet in years pass the PUC was so adamant about the buy in from GTE & Verizon and yet this time the tune and approach suddenly changes and to have a few determine the fate of the many, shame, shame on you folks....very disappointed in that the big \$ is overpowering your responsibility to make reasonable decisions....a very irate employee!
